TAXUS

This year we are offering Taxus from rooted cuttings through finished sizes. We believe that twice transplanted Taxus may be readily moved until they are seven years old. After that they must either be transplanted or root-pruned. A 7 year TT plant is a good item for the garden store trade. It is neither too large and bulky nor too small and tender for handling.

All rooted cuttings and 2 year bedded liners are graded heavy. All field grown TT plants are ungraded, row-run, unless otherwise indicated. If you prefer select, heavy plants add .10 to the listed price. If you desire the 5 or 6 year plants balled add .10 for selected plants and .30 for balling.

All finished plants are three times transplanted, heavily sheared specimens.
